Dear Office of the Secretary:

On behalf of the 550,000 members of the Boat Owners Association of The United States (BoatU.S.), we concur with and support the U.S. Coast Guard's position on the Martel, Inc., Petition for Rulemaking Regarding the Use of Maritime VHF Channels 87B and 88B (Nov. 7, 2003).

We are very concerned about the loss of the last available internationally-interoperable and recreational-vessel interoperable VHF spectrum in the United States. While it may appear that the issue of AIS is of a commercial vessel nature, all mariners — including recreational boaters — could be negatively affected if the petition succeeds. These VHF channels are essential to port security and maritime safety and allowing a third party to control these frequencies and profit from them is not in the best interest of the government, its citizens, or mariners.

Thank you for the opportunity to comment.

Sincerely,

Elaine Dickinson

Asst. Vice President
